

RunSignUp Mobile

User Instructions

How to Install

RunSignUp Mobile is in beta, so the installation process is more complicated than simply downloading from the app store. To begin, retrieve your UDID number:

- Plug your device into your computer, and open iTunes
- Click on your device in the upper right to view its information.

- Click on the summary tab and locate the text that says “Serial Number”

iPhone 5

- Click on the “Serial Number” text and it will change to “Identifier (UDID)”
- Right click on this and select “Copy Identifier”.

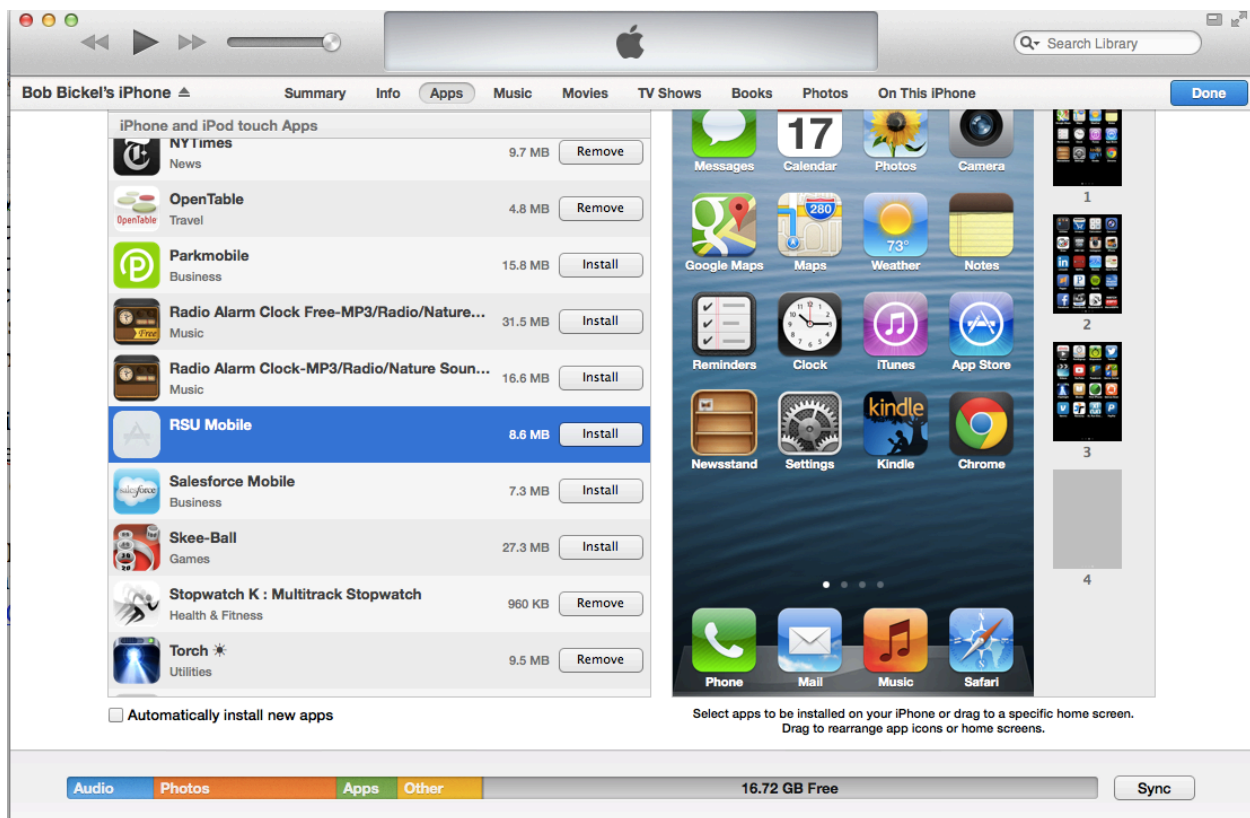

iPhone 5

- Email this identifier to billy_connolly@comcast.net, along with your name and the type of device (iPhone 3GS, 4, 4S, 5, iPod Touch 5th Generation etc.)

Upon receiving the reply email, plug your phone into your computer and open iTunes.

- Drag the .mobileprovision file onto the iTunes icon,
- and then drag the .ipa file onto the iTunes icon.
- Click on the sync button and you should be ready to test!

Please keep in mind that RunSignUp Mobile is currently in beta and is meant as a starting point for others to use the source code however they wish. Also, it connects to the test.runsignup.com server – not the production server!

All feedback is appreciated, and you can get in touch with us via email (billy_connolly@comcast.net, bob.bickel@comcast.net, info@runsignup.com), or by tapping “Report Bug” in the lower right hand corner of the main menu of RunSignUp Mobile.
