RunSignUp Mobile

How to Install

RunSignUp Mobile is in beta, so the installation process is more complicated than simply downloading from the app store. To begin, retrieve your UDID number:

- Plug your device into your computer, and open iTunes
- Click on your device in the upper right to view its information.
- Click on the summary tab and locate the text that says "Serial Number"
- Click on the "Serial Number" text and it will change to "Identifier (UDID)"
- Right click on this and select "Copy Identifier".
